EDUCATION

University of Houston, Houston, Texas
B.S. in Computer Science, Minor in Mathematics

August 2019 - May 2023
GPA: 3.82

Relevant Coursework: Data Structures; Computer Organization and Architecture; Operating Systems; Fundamentals of Software Engineering; Software Design; Interactive Computer Graphics; Linear Algebra; Discrete Mathematics

SKILLS AND KNOWLEDGE

Languages: C++, Python, HTML5, CSS, JavaScript/TypeScript, SQL, Latex

Tools: MS Visual Studio, MS Visual Studio Code, IntelliJ, LaTeX, MySQL, Ubuntu, RStudio, Unreal Engine 5, Godot

Spoken Languages: English, Cantonese Chinese

ACADEMIC PROJECTS

Fuel Quote Generator - Full-Stack Web Application

January 2022 - May 2022

Team Lead - React, Express, MySQL, HTML, CSS, Javascript

- Developed a full-stack web app for generating fuel quotes with a tabulated history page for user records, using React for the front-end and Express for the back-end.
- Implemented authentication, password hashing, and integrated a MySQL database for data persistence.
- Wrote unit tests with Jest to ensure high code reliability and robustness.

Amusement Park Planning Using Graph-Based Approaches

November 2020 - December 2020

Team Lead - C++

- Led a team of 3 to create a program to evaluate amusement park blueprints.
- Found network of roads connecting main attractions using graph theory techniques such as Kruskal's algorithm.
- Identified Eulerian paths and circuits by traversing through all main attractions using depth-first search.

PERSONAL PROJECTS

CritiCore - Front-End Web Application (Live Demo Available)

November 2024 - January 2025

Individual - Next.js, HTML, CSS, Tailwind CSS, TypeScript

- Developed a responsive, mobile-friendly game reviews aggregator web app using Next.js, integrating data from Steam and OpenCritic APIs.
- Designed and implemented a homepage, dynamic game pages, and a Steam-only search page, displaying data pulled from Steam and OpenCritic API endpoints.
- Optimized navigation and API data loading using Next.js and Upstash/Redis caching, while enhancing SEO with robots.txt, sitemaps, and Open Graph metadata for improved search engine visibility.

Urban Luxe - Front-End Web Application (Live Demo Available)

June 2024 - July 2024

Individual - Next.js, HTML, CSS, TypeScript

- Developed a responsive, mobile-friendly e-commerce apparel store using Next.js.
- Created a homepage carousel, a product display page with filtering, dynamic product pages, and an interactive shopping cart.
- Simulated back-end integration using mock data and implemented SEO best practices, including robots, sitemaps, and Open Graph metadata.

Unnamed Game - Game Development in Unreal Engine 5

March 2024 - Present

Individual - Unreal Engine 5

- Developed a level in Unreal Engine 5, implementing DLSS 3.5 and FSR 3.0 to enhance graphics performance, resolution scaling, and a settings menu with other various adjustable options.
- Created and integrated custom models and animations, along with a functional health pool system with basic combat.

Unnamed Game - Game Development in Godot

November 2023 - Present

Individual - Godot

- Developed a 2D tileset level with battle encounters and a turn-based combat system, including health, damage mechanics, and interactive UI elements.
- Integrated custom sprites and animations, and implemented an attribute system linked to the combat mechanics.
