EDUCATION

University of Houston, Houston, Texas
B.S. in Computer Science, Minor in Mathematics

August 2019 - May 2023
GPA: 3.82

SKILLS AND KNOWLEDGE

Languages: C++, Python, HTML5, CSS, JavaScript/TypeScript, SQL, Latex

Tools: Windows, Linux, Ubuntu/Kubuntu, Git, VSCode, MySQL, LaTeX, RStudio, Unreal Engine 5, Godot, Blender

ACADEMIC PROJECTS

Fuel Quote Generator - Full-Stack Web Application

January 2022 - May 2022

Team Member - React, Express, MySQL, HTML, CSS, Javascript

- Developed a full-stack web app for generating fuel quotes with a tabulated history page for user records, using React for the front-end and Express for the back-end.
- Implemented authentication, password hashing, and integrated a MySQL database for data persistence.
- Wrote unit tests with Jest to ensure high code reliability and robustness.

Amusement Park Planning Using Graph-Based Approaches

November 2021 - December 2021

Team Member - C++

- Collaborated with a team of 3 to create a program to evaluate amusement park blueprints.
- Found network of roads connecting main attractions using graph theory techniques such as Kruskal's algorithm.
- Identified Eulerian paths and circuits by traversing through all main attractions using depth-first search.

PERSONAL PROJECTS

CritiCore - Front-End Web Application (Live Demo Available)

November 2024 - January 2025

Individual - Next.js, HTML, CSS, Tailwind CSS, TypeScript

- Built a responsive Next.js game reviews aggregator with dynamic pages, Steam-only search, and API integration from Steam and OpenCritic.
- Implemented caching (Upstash/Redis), optimized navigation, and applied SEO enhancements (robots.txt, sitemaps, Open Graph) for performance and discoverability.

Urban Luxe - Front-End Web Application (Live Demo Available)

June 2024 - July 2024

Individual - Next.js, HTML, CSS, TypeScript

- Built a responsive Next.js e-commerce apparel store with dynamic product pages, filtering, homepage carousel, and interactive shopping cart.
- Implemented mock backend data integration and SEO enhancements (robots.txt, sitemaps, Open Graph) to improve discoverability.

Unnamed Game - Game Development in Unreal Engine 5

March 2024 - Present

Individual - Unreal Engine 5, Blueprints, Widgets

- Developed a UE5 level featuring DLSS 3.5 and FSR 3.0 for enhanced graphics, a settings menu, custom models and animations, and a basic combat system with health management.

Unnamed RPG Game - Game Development in Godot

November 2023 - Present

Individual - Godot, GDScript

- Developed a 2.5D Godot game level with Blender-designed environments, implementing battle encounters, a turn-based combat system, dynamic combat camera, interactive UI, custom sprites, animations, and attribute-linked mechanics.

ADDITIONAL EXPERIENCE

HVAC Operations Assistant

August 2023 - Present

All Temp

- Coordinated with the technician in a small-team environment, assisting with daily operations, scheduling, and customer communications.
- Maintained and organized HVAC inventory and supported operational and physical tasks to ensure projects stayed on track.
